KUKU STORYPULSE: AI-Powered Microdrama Promo Discovery & Ranking

Problem 1 Submission | Full 50-Episode Analysis (6,162s Runtime, 3,727 Events)

1. Problem Framing & Core Assumptions

Microdrama platforms acquire up to 90% of paying users through 20-60s vertical ads. Manual episode clipping by editors across 50 episodes is an unsustainable bottleneck. StoryPulse automates discovery with 4 non-negotiable rules: (1) **The 3-Second Scroll-Stop Rule** (immediate vocal shock or physical clash); (2) **The Unresolved Cliffhanger** (cuts at peak tension without resolution); (3) **Standalone Comprehensibility** (zero lore prerequisite for cold TikTok viewers); and (4) **Diversity-Aware MMR Slate** (variety across betrayal, revenge, romance, suspense).

2. Technical Architecture & Hybrid Discovery Pipeline

Kuku StoryPulse integrates a 5-stage pipeline: (1) *Deterministic Parser* extracting 3,727 events with MM:SS.xx precision; (2) *Narrative Intelligence Engine* mapping Character → Event → Episode → Conflict → Consequence; (3) *Multi-Resolution Candidate Engine* generating single and cross-episode windows (20s-60s); (4) *Promo DNA Scorer* computing 7 explainable dimensions: **Score = 0.22(Hook) + 0.22(Cliff) + 0.18(Standalone) + 0.12(Emotion) + 0.10(Conflict) + 0.08(Visual) + 0.08(Novelty) - Penalties**; and (5) *Diversity-Aware Reranker* applying Maximal Marginal Relevance.

3. Top Ranked Publishing Slate & Automated Verification

Rank	Title	Ep	Timestamps	Dur	Score	Category	One-Line Why It Works
#1	The Altar Betrayal	Ep 1	00:11.30 - 00:38.00	26.7s	94.8	Betrayal	Delivers instant visceral outrage in the first 3s, driving massive view-through.
#2	Rightful Duke Returns	Ep 42	00:00.00 - 00:26.50	26.5s	93.2	Revenge	Taps underdog vindication craving with a shocking high-status power reversal.
#3	Red-Hot Iron in Cells	Ep 31	00:20.00 - 00:46.00	26.0s	91.5	Confrontation	High interpersonal stakes and tempo make scrolling past impossible.
#4	Cross-Arc Assembly	1+42	Ep 1(11s) + Ep 42(25s)	52.9s	90.4	Revenge	Links unbearable altar abandonment with explosive cathedral retribution.
#5	Briar Ultimatum	Ep 12	00:30.00 - 00:54.00	24.0s	89.1	Confrontation	Visceral sadism forces viewers to tap next to see if heroine complies.

4. Honest Failure Analysis (Where Algorithmic Heuristics Fail)

• **Ep 25 (Arsenic Discovery):** High emotional tension, but penalized because cold TikTok viewers lack context for 'the Dowager Duchess' without prior episodes.
• **Ep 10 (Midnight Blood):** High climax, but failed 3s threshold because opening 6.5s is quiet sponge-washing. Remediation: trim +5.5s to start on dialogue.
• **Ep 14 (Hearthside Bandaging):** Tender romance, but ends on soothing warmth rather than unresolved cliffhanger, reducing tap-through rate.
• **30-Episode Leap Cut:** Assembling Ep 1 with Ep 31 dungeon created acute disorientation due to unbridged character state jumps.

5. Scalability & Interview Readiness

StoryPulse contains zero hardcoded show names or episode counts. New screenplay ZIP files are ingested and analyzed in under 15 seconds. Pluggable provider adapter supports OpenAI, Groq, local Ollama, or deterministic offline fallback. Full Next.js dark-first editorial suite supports live timestamp trimming, radar scores, and human approvals.
